Why No-Code Isn't Optional

No-Code and Vibe Coding

Vibe Coding

**Build applications
& processes
without writing
traditional code**

Automations

**Streamlining
processes
through software
without manual
effort**

Integrations

**Connecting
various tools
to enhance
productivity
and workflow**

Timeline of No-Code Evolution

Early 2000s

Emergence of
user-friendly web
builders

2010s

Rise of no-code
platforms like
Zapier

2020s

Expansion of vibe
coding
communities and
tools

Use Cases

Internal Tools

**dashboards,
automate
reports, improve
decision making
flows**

Prototyping

**Validate features
before backlog
commitment**

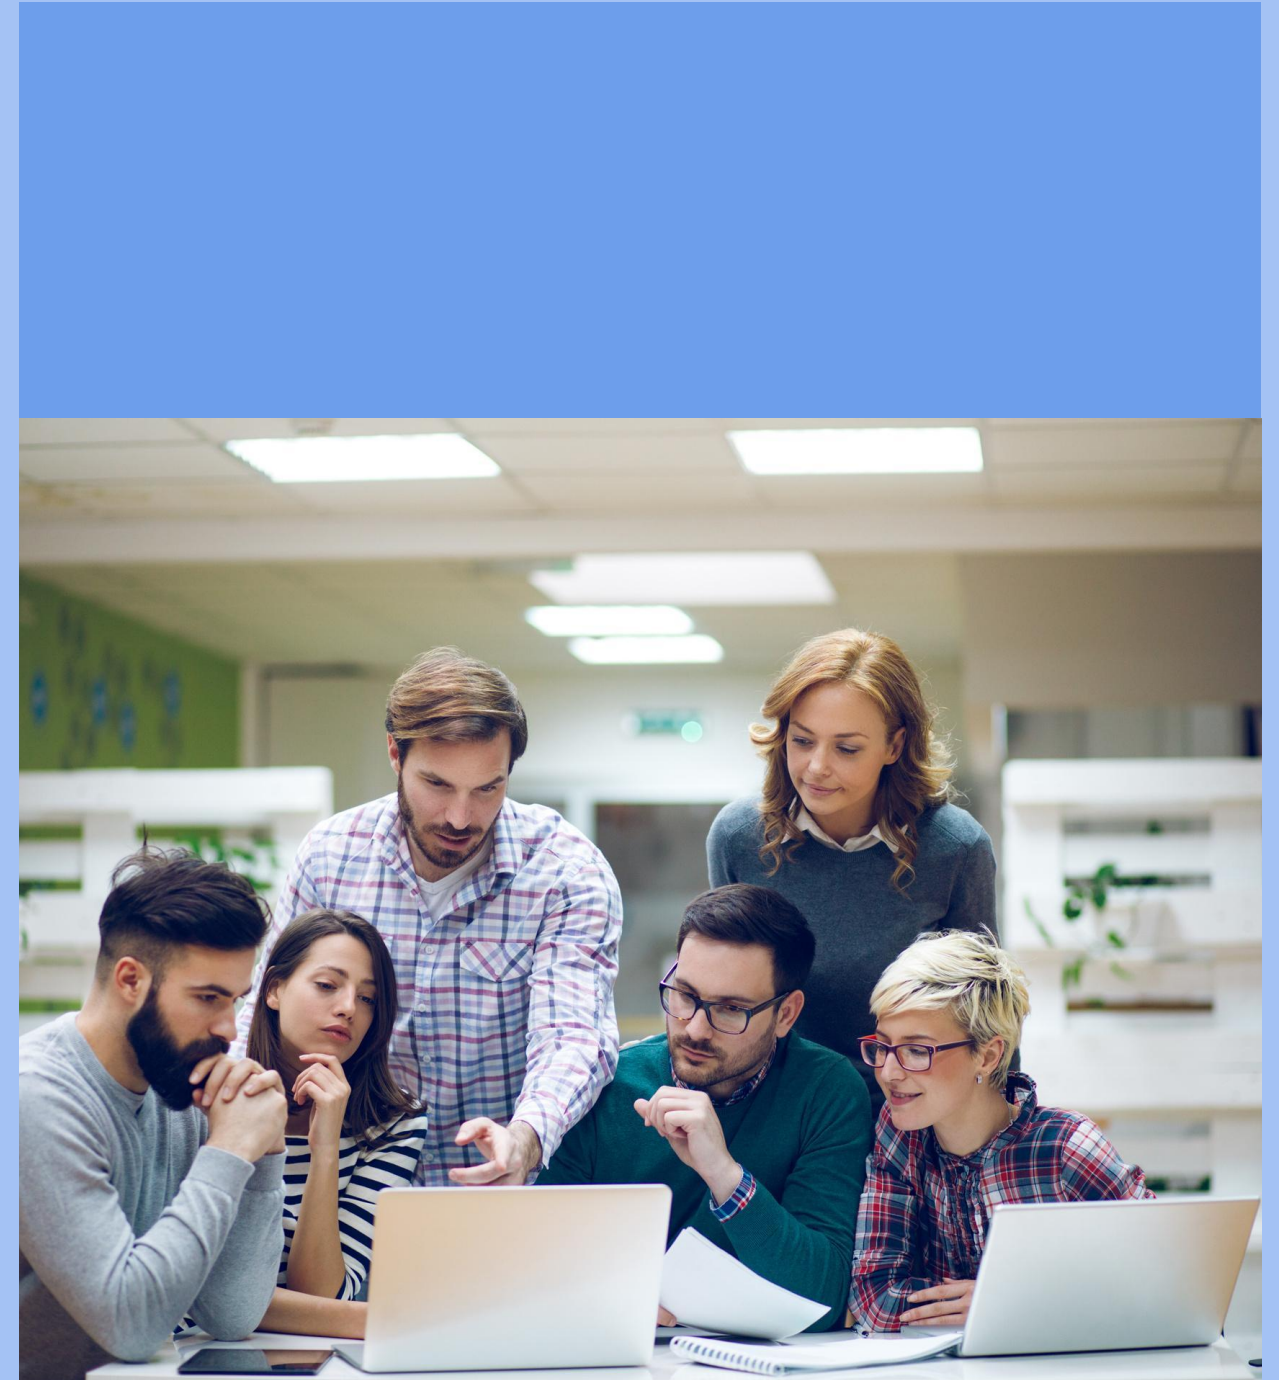

MVPs

**Ship a “sellable”
first version fast**

Getting

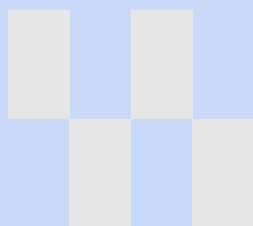

Started

- Define your project goals clearly
- Explore available no-code platforms
- **Start with a simple prototype**
- **Align features with business metrics**

Common Traps & How to *Avoid* Them

Over-building

Wrong tools
